

Patient Information Handout sheet

Our practice has decided to outsource our medical reporting to Medi2data, who will process your report using eMR.

What is eMR/Medi2data?

Medi2data are a NHS Digital accredited company who have developed a digital system called eMR, which enables GP practices to create digital, GDPR compliant medical reports.

eMR helps GP Surgeries with data security, speed and efficiency

eMR also helps you to easily see your medical data, stay in control of it and decide who you want to share it with.

Medi2data has worked hard to develop their NHS GP IT Futures accredited technology, eMR, which interfaces with our GP practice's system to extract your medical record. This means you can receive a full copy of that information securely and share it with others as you wish, keeping your data safe.

If you wish to speak to a member of the eMR team regarding your medical report or any concerns you may have regarding your data, please contact the eMR team directly on:
